

EAVES PROTECTION SYSTEM

A high quality 100% recycled PVC support tray that ensures any roof underlay does not drape into the gutter, preventing water ponding behind fascias and rotting of roof underlay, thus reducing maintenance levels.

PRODUCT CODE: 10697349

DIMENSIONS: 230mm x 1500mm (33mm over hang)

COLOUR: Grey

MATERIAL: PVC

WEIGHT: 500g e

INSTALLATION

The tray should be positioned on top of the fascia board and fixed into place with nails.

Adjacent trays should overlap by a minimum of 150mm to form a continuous run and adequately support roofing underlay.

The tray should be fitted on top of the FIX-R Over Fascia Vent (10mm: 10696198 25mm: 10696197).

Roofing underlay should be laid tightly to ensure that there are no troughs for water to sit.

The bottom edge should be higher than the line of the fascia board to avoid exposure to the elements and consequential degradation.
